

Priority Additional Modules

Instant Addressing Module - Quick Address Integration

Introduction

eMerge Information Technology Ltd is proud to announce the release of its Instant Addressing Module incorporating use of the 3rd party QAS[®] system.

Purpose

For those organisations who want to be able to generate customer details accurately every time by inputting only the post-code and building name/number. This enables highly accurate address information to be automatically generated with the minimum of user input.

The screenshot displays two overlapping windows from a software application. The top window is a 'COMPANY' form with the following fields:

- COMPANY** (tab)
- Number: []
- Name: []
- Inactive?:
- Cust. Group: [] []
- Sage Ref No: []
- Inv Add & Phone** (tab)
- Street Address: []
- Address Line 2: []
- Address Line 3: []
- Town: []
- County: []
- Post Code: **SO50 9FD**
- Company Tel No: []
- Company Fax No: []
- Company E-Mail: []
- Country: []
- Catalogue Contact: []
- Projects Contact: []

The bottom window is titled 'Enter an address for Priority' and contains:

 - Exign Technology, Wessex House
- Footer: Emmerge Information Technology Ltd, Wessex House, Upper Market Street, EASTLEIGH, Hampshire, SO50 9FD
- Footer: Type to reduce picklist or select an item [Single Line] Matches: 12

Operation

This facility can be used wherever there is a need to enter new customer address information into a Priority form. After input of the post code, a Priority trigger accesses the QAS database and provides a selection of building name/number options for the user to select. Once the appropriate option is selected, the correct and verified address (and optionally other commercial data) is automatically uploaded to the appropriate Priority customer record fields.

Benefits

This module provides customer-focussed organisations with the tools to minimise their data input overhead and increase their data quality. It provides multi-country support, instant address matching to entry of the post-code and provides the unique typedown feature. With typedown, as the user types the address, an ever-decreasing number of options is presented to the user for selection. Both this and the post-code searching capability provide massive keystroke savings when entering customer address data. Address verification also ensures that the address entered into your Priority database is correct according to the latest Royal Mail information.

Options

This facility can either act simply for the address fields required or can include Experian database information. Address information can be generated for any address fields anywhere in Priority. The commercial information is available for an additional annual licence fee.

Prices

Indicative pricing per user

	Initial Licence	Annual Licence
Standard Address information	£1250	£250
Address plus Business Information	£2500	£600

* These prices include all relevant third party licences to Royal Mail and Experian.

Ordering

If you require this Priority module please contact your eMerge account manager or project manager or alternatively contact Customer Service on 0845 230 6760.

About eMerge
