

IT'S YOUR PRIORITY

VERSION 15 – HIGHLIGHTS TO BENEFIT YOUR BUSINESS

General

Support for Internet Explorer 9. Support for 64-bit Microsoft Outlook.

Migration to Microsoft Silverlight Technology

First ERP system to be ported to Microsoft Silverlight technology.

Enabling technology allowing support across multiple browsers and operating systems.

Re-Design of Html (Marketgate) Interface to Operate on Mobile Devices (e.g. iphone, ipad, Android)

Available transactions include: CRM data, Sales Orders, Tasks, Service Calls, Purchase Req's & Orders, Project Reports, Calendars, Work hour & absence reports.

Preventative Maintenance Module

Prepare servicing plans for routine maintenance. Manage servicing and repairs by a sub-contractor.

MS-Outlook Priority Synchronisation Tool

Tools within Outlook allowing synchronisation of individual messages, service calls and tasks with Priority.

Time and Attendance Module

Collection of employee time and attendance information for upload to payroll systems (including overtime, holidays, etc). N.B. This module will require extensive UK testing before release in the UK.

Customer Relationship Management (CRM)

Significant additional functionality to Sales Opportunities and Marketing Campaigns including analysis of reasons for failure. Group discussions (similar to a "blog") enabling multi-user workspace within Tasks.

Point of Sale

POS module released for integration and management of retail point-of-sale terminals.

System Management

Creation of privilege groups and allowing users to belong to different groups in different companies.

Central management of BPM rules. Limited system maintenance access for non-system manager users.

Warehouse Management

WMS Lite module released.
